INFORMATION TECHNOLOGY

Information Technology

Information Technology (IT) utilized worldwide across all Government agencies faces increasing optimization pressures, enhanced service demands, and competitive affordability constraints. **Summit Technical Solutions (STS) is an IT services provider offering customers the latest technology, performance assurance, and administrative support necessary to excel in today's fast paced IT market. We provide our customers a technical process centric, repeatable, and cost efficient approaches.** Our team of technical experts deliver on-time, collaborative solutions to protect our customers' interests and assets while improving their mission critical activities.

Our ISO 9001:2015 quality controlled processes enables our team to focus on quality and configuration management in response to changing technology and future growth requirements. **For over 10 years we have continuously supported IT functions for the Army and the Air Force around the globe.**

Our Proven IT Solutions and Professional Services:

- Cybersecurity Planning and Operations
- Help-Desk and On-Call Support
- Network and Systems Administration
- Software/Hardware Installation, Management, and Maintenance
- Certification and Accreditation
- Independent Validation & Verification Assessments
- Technical Procedural Documentation
- Video Teleconferencing Operations
- Integration & Maintenance of Electronic Security and Monitoring Systems
- Incident Response Support

Cybersecurity Operations

STS personnel provide technical support across multiple IT Operational support areas to include Program Management, Federal Information Security Management Act (FISMA) assessments, Independent Validation and Verification (IV&V) assessments, Risk Management Framework (RMF) system reviews and accreditations, and Enterprise Mission Assurance Support Service (eMASS). Our personnel design, implement, maintain and review systems, cyber measures, controls & agency specific cyber requirements to improve the overall network and system security architecture.

IT Lifecycle Management

At STS, our specialists provide complete life cycle management of software, hardware, and other IT equipment through design, test, data analysis, management, and installation of new systems. We have the expertise to support classified and unclassified networks, VTC systems, Command and Control Systems, Voice Systems, desk positions and terminals. **STS recognizes key considerations necessary for equipment standardization, interoperability, configuration control, scalability, and the flexibility to adapt to changing requirements.**

Case Study: Risk Assessments

Client: U.S. Army Space and Missile Defense Command (USASMDC).

Project: Command Information Management System III (CIMS III contract. CIMS provides a host of non-commercial integrated information technology (IT) services and solutions for steady state and serge needs at various SMDC elements around the U.S.

Client Results: USASMDC utilizes software that requires yearly assessments for accreditation by the Army Network Enterprise Technology Command (NETCOM). The yearly system audits ensure systems that integrate with DOD programs are in compliance with DOD cyber requirements.

The STS team provides thorough review and risk assessments of these systems and associated databases to ensure compliance is met before these re-accreditation audits occur, mitigating any findings of non-compliance. In January of 2019, our CIMS-III STS team performed a risk failing assessment of the Army Force Tracking Cloud (FTCloud) Risk Management Framework, reviewing the program and associated database for errors that would cause a non-compliance during a NETCOM audit.

As a result of the risk failing assessment made by STS, five major findings, each multi-part issues, were reported to the owner of the FTCloud system. Upon review and collaboration with the SMDC system owner, the STS team assisted with the resolution of each of the findings, updating the systems and databases, preparing the software for a successful review by NETCOM.

THE FORMULA FOR SUCCESS

Team STS delivers a comprehensive collection of IT services to help our customers navigate changing technology with affordable, responsive IT solutions.
